The Wireless Home Phone device uses the AT&T cellular network to provide phone service to your cordless or corded home phone(s). Place it anywhere in your house where you have a wireless signal. It does not require the use of a home phone wall jack like traditional home phone service.

To place phones throughout your home, use a cordless phone system with multiple handsets. Wall jacks are not used with Wireless Home Phone. Useful Tips • Transferring a phone number can take about four days, so you should keep a phone plugged into your wall jack to receive calls on your old service (including 911) until your transfer completes.

Please thoroughly read this user's manual for all the feature operations and troubleshooting information necessary to install and operate your new AT&T product. You can also visit our website at www.telephones.att.com or call 1 (800) 222-3111 .
