18/6/2012 · Ever build your own HD antenna? ... It's a relatively quick project, and the reward you get is free

over-the-air HD (if you're in range) right to your TV. G/O Media may get a commission.

You will not believe it until you try it, but this works better than any other antenna I have ever used for over-the-air digital TV. I have tried every antenna possible from dollar store 10 buck antennas to \$50 Phillips HDTV indoor/outdoor antenna and the bare wire works better than them all (even when I put the \$50 antenna on my roof).

19/12/2012 · First, start by cutting the soda can in half the long way with tin snips, or shears. Mount these can halves to something to keep them in place. I used a staple gun to hold them to a piece of scrap wood. I also attached a small-gauge wire to the inside corner of each half. This will be a pain.

4/3/2011 · Place heat-shrink tubing over the tips of the ears and use a flame or heat gun to shrink it tight to the wires. Use coaxial cable to connect a digital-signal-ready television or converter box to ...

Build your own Wire Antenna! Posted On By Sascha Posted in Antennas. 01 – Tee Antenna. 02 – Half-Lambda Tee Antenna. 03 – Twin-Led Marconi Antenna. 04 – Swallow-Tail Antenna. 05 – Random Length Radiator Wire Antenna. 06 – Windom Antenna. 07 – Windom Antenna – Feed with coax cable.

22/7/2012 · It is time to go completely cable-free, adopting over-the-air HD broadcasts and online streaming services. This DIY project is about using a piece of coaxial cable to make a simple and cost effective UHF dipole antenna to receive the free local OTA (over-the-air) digital HDTV signals.

2/9/2013 · The ZS6BKW antenna is a better match for our bands than the G5RV. The method of construction and tuning is essentially the same for both antennas but the dimensions are different. The ZS6BKW is a "random length dipole" with ladder line acting as a ...

Your TV is digital-ready if It has a built-in DVB-T2 digital tuner. If you bought your TV before April 2013, it is likely to be not digital-ready. You may wish to check with your TV manufacturer to confirm if your TV has the built-in DVB-T2 digital tuner to receive free-to-air DTV channels.

I have tried every antenna possible from dollar store 10 buck antennas to \$50 Phillips HDTV indoor/outdoor antenna and the bare wire works better than them all (even when I put the \$50 antenna on my roof).

Adjust your antenna, rescan, and reassess. Small changes in the angle can make a big difference—I made one 10-degree change and lost about 15 channels. Find a solid combination you like, then secure your antenna to that angle. Your reception will not always be just like you set it up.

Then build this diy hdtv antenna for almost nothing and get better results. My Yagi style antenna I got from ebay was pulling about 60-85 signal strength on most channels and ALWAYS would have continual dropouts making it impossible to watch Free OTA (over the air...
