26/7/2018 · Financial Accounting focuses on providing information about the functioning of the entity's business to its users, whereas Management Accounting focuses on providing

information to help them in evaluating the performance and devising plans for the future.

Financial Accounting is concerned with the

ways in which the financial transactions of a business are recorded and summarised in financial statements. This module provides an introduction to the construction of financial

statements and an understanding and evaluation of the principles and concepts on which they are underpinned.

Accounting information is summarized to produce financial statements. Financial Statements provide an overview of the financial activities of a business during a

period (e.g. cash flow, income and expenses during the year) as well as information about its financial position on a specific date (e.g. amount of cash and inventory at the end of the

year).

This lecture note is an intensive introduction to the preparation and interpretation of financial
