The last Colossus is believed to have stopped running in 1960. The war over, key Bletchley personnel moved to Manchester University. Various of the electronic panels from dismantled Colossi were taken to the newly created Computing Machine Laboratory there, although not before every trace of their original purpose had been removed.

Colossus II—the first of what Flowers referred to as the ‘Mark 2’ Colossi 73 —was shipped from Dollis Hill to Bletchley Park on 4 May

1944. 74 The plan was to assemble and test Colossus II at Bletchley Park rather than Dollis Hill, so saving some precious time. 75 Promised by the first of June, Colossus II was still not working properly as the final hours of May ticked past.
