According to Richards and Schmidt (2010), CA is based on three primary assumptions. First, the major difficulties in

Errors as much as 71.4%. Then factors which cause a large number of errors are owing to Intralingual errors as much as 59.5%, namely because there is presumption in their mind that English is very difficult to study. Keywords: Analysis of English Errors, Classification of English Errors, Sources of English Errors ...

However, in describing the error, the analysis was done through configuration only by the qualitative method. The result shows that out of twenty-six verbs, twelve chosen verbs were less precise. Through

Metalanguage, those errors can be described configurationally.
