19/2/2021 · The brake caliper guide pins are located at the brake caliper bracket and help the caliper to slide forward and backward when you are braking. Commonly, these guide pins will get stuck by rust, which will prevent the brake caliper from functioning properly and, therefore, cause sticking brakes. These guide pins have rubber boots around them to protect them from water and dust. Check the rubber ...

3/7/2017 · Notes: The reasons for all this are manifold: to avoid changing gear mid-corner, which upsets the car in one way or the other - to gain enough top speed down the longest straight, but not waste performance - to avoid changing gear just before a braking point, which costs you time on track and may divert your concentration from the important braking point and eventual steering corrections you have ...
