[Free Download] Documentation Of Regional  
Anaesthesia Progress Note [EPUB] [PDF]

Regional anaesthetic blocks/infusions are used to provide local

anaesthetic to a discrete area of the body. ... Document on the LDA;  
Regional anaesthetic infusion delivery via ON-Q PainBuster ... The  
effectiveness of the analgesia should be recorded in the Nursing  
Progress notes.

Documentation and Orders Cont. 3. Begin documenting the note. v. Call  
Schedule The regional service has a ghost pager that will be forwarded  
to the resident on call. The number is 25625 (which spells out “block”).  
The OSC resident carries the call pager as they place most of our

outpatient catheters.

1/11/2017 · It is important that a number of safety measures are taken to ensure the most suitable regional anaesthesia (RA) technique is performed for the correct patient. These measures include obtaining patient consent, checking all equipment and drugs, ensuring appropriate monitoring and performance of a correct surgical site check. Once the regional block is performed, it is vital to ...

specifically for anaesthetic assessment. A variety of models of 'preoperative' or 'anaesthetic assessment' clinics exist; the following is intended as an outline of their functions. Those who require greater detail are advised to consult the document produced by the Association of Anaesthetists (see Useful websites). Stage 1 —Screening

- Full record keeping incl prescription charting
- Equipment: ? Catheters & giving sets must be well labelled and specifically a diff colour ?

Dedicated pumps with set protocols to avoid OD • Post procedure r/v: ?  
Local protocols to r/v for complications, effectiveness, side effects,  
timing of removal ? Daily r/vs

The increased popularity of regional anesthesia has resulted in advancement in techniques and equipment. The practice has evolved from using paresthesia for nerve localization to electrical nerve stimulation and, currently, to ultrasound. This chapter gives an overview of the equipment available in the practice of peripheral nerve

blocks. It also outlines the equipment needed at various stages ...

Postoperative anaesthetic review revealed no neurological complications related to the regional technique. Discussion Although the anaesthetic management of pregnancy in the presence of ankylosing spondylitis has been described before [ 4-6 ], this is the first case reported in twin pregnancy from in vitro fertilization undergoing Caesarean delivery.

Regional anaesthesia, eg a spinal or epidural, involves injections that numb a larger or deeper part of the body. You stay conscious or receive some sedation, but are free from pain. For some surgery you may be aware of pressure sensations. General anaesthesia gives a state of controlled unconsciousness.
