The fuel pump installed to  
the 2.4L Duratorq-TDCi  
(Puma) diesel engine is  
driven by the crankshaft by  
means of a timing chain.  
The fuel pump is located at

the front end of the cylinder block. Fuel is drawn from the fuel tank through the fuel filter by means of a transfer pump.

Pablo tells you you have a  
Ford fuel pump that is  
electric since you have a  
Ford fuel delivery system  
that uses direct injection to  
get fuel to your engine. The

electric fuel pump is located inside the fuel tank as opposed to being attached to the engine block like mechanical pumps. Since your electric pump cannot handle gas vapor very well, placing it far from the engine inside the fuel tank

submerged in cold liquid ...
