industries. It has been observed that Cronbach's alpha lie between 0.75 and 0.85 which indicates that the selected performance parameters are reliable for comparative

analysis of performance of just in time and non just in time based industries.

2.1. Just in time The notion of JIT production

was described by Taiichi Ohno, the godfather of Toyota production system, as ” All we are doing at the time line from the moment the customer gives us an order to the point when

we collect the cash, and we are reducing that time line by removing the non-value-added wastes” (Liker, 2004).
