19/1/2021 · The HP 10BII financial calculator has a built in settings for payments per year that attempts to auto-adjust the interest rate based on how many periods there are in a year. However, this does not auto-adjust the N and PMT components (you still have to do this manually), which makes this function cause more problems than it's worth.

Bond calculations are performed on the 10bII+ in the Bond menu. Data or settings are stored in the ten keys which make up the top two rows of the keyboard. The functions used in bond calculations are printed in blue above the keys. The table below lists the keys used in bond calculations and

their functionality. Keys.
