location. Table 1 in ACCA's Manual J lists design conditions for locations in the U.S. and Canada. This information should be consulted to ensure that the proper type and location of duct system is selected for the structure in question. The ASHRAE Fundamentals Handbook contains HVAC design criteria for most countries around the world.

1/11/2019 · Ventilating attic spaces is often viewed as a technical requirement for steep-slope roof assemblies, as well as a building code requirement. However, since the 2009 edition of the IRC, attics can be designed to be either vented or unvented. So, the decision to vent an attic space is not dictated by building

code; it really is a design choice.

FOREWORD The purpose of the NEBB Procedural Standards for Testing Adjusting and Balancing of Environmental Systems is to establish a uniform and systematic set of criteria for the performance of the testing, adjusting and balancing of environmental or Heating, Ventilating and Air-conditioning (HVAC) systems. Today's buildings provide highly controlled indoor environments.
