Documentation plays an important part in Information Technology. Work instructions, help desk scripts, knowledge bases, and vendor instructions are only a few examples. The key to writing good technical documentation is in the format of the document. No matter how good the information is, if it is not well formatted it can be difficult to use.

I know as IT professionals we try to be efficient and not re-invent the wheel when we can modify the existing one to suit our needs. In that spirit I am providing some documentation relatively generic to somewhat specific, hopefully for your use. I hope you can find some of this stuff useful. At least for the basis of your own documentation in house.
