28/5/2017 · Take a walk on the functional side with this look at how OOP and FP mix and how Java 8's streams and lambda expressions can augment your toolkit.

The key point is: always extract complex lambdas into functions with an

expressive name that you can then reference using four-dots ( :: ) from: the same class ( this :: ); another class ( mapper:: );

In addition to Java 8's lambdas and streams, Java 9 adds a host of new features of its own. It includes new library features to support reactive programming, which give users new ways of thinking about programming and writing code that is easier to read and maintain.
