Operational considerations for case

management of COVID-19 in health facility and community This document is intended to guide the care of COVID-19 patients as the response capacity of health systems is

challenged; to ensure that COVID-19 patients can access life-saving treatment, without compromising public health objectives and

safety of health workers.

The manual includes guidance on case plan content; identifying services, supports, and

tasks to include; and developing behavior-change statements in collaboration with the parent or legal guardians. Facilitated Family

Engagement

A “major case” is defined as an event that exceeds a unit/police services’ normal

resourcing requirements (e.g., homicides, major frauds or any other investigation of a complex nature). The system is typically used in situations where numerous personnel are

required and allows for the creation of tasks and assignment of those tasks to investigators.

Major issue management introduces the

concept of a major case which contains the details about a particular issue. Child cases can easily be created for a major case, with one child case created for each customer affected

by the issue. These child cases contain the customer-specific information.
