With the recent great expansion in optics and laser applications, several

new areas of research have emerged, among which are: the theory of coherence, photon statistics, speckle phenomenon, statistical optics, atmospheric propagation, optical communications, and light-beating and photon-correlation spectroscopy.

Emphasis is placed on the photoelectron measurements that yield in-

formation pertinent to spectroscopy and optical communication. Although some books that treat the theory of coherence and the statistical properties of light are available, the vast body of information central to problems of photoelectron statistics and its applications is scattered in various professional journals and ...

About AIP Publishing. AIP Publishing is a wholly owned not-for-profit
subsidiary of the American Institute of Physics (AIP). Our portfolio

comprises highly regarded, peer-reviewed journals, including a growing portfolio of Open Access titles, that cover all areas of the physical sciences.

Atlantis Press – now part of Springer Nature – is an open access publisher of scientific, technical and medical (STM) content founded in Paris in 2006. Our mission is to support the advancement of STM research by contributing to a more efficient and effective dissemination and exchange of knowledge both for the research community and

society at large.

De Gruyter publishes first-class scholarship and has done so for more than 270 years. We are an international, independent publisher headquartered in Berlin. We publish over 1,300 new book titles each year and more than 900 journals across the humanities and sciences.
