**Question And Answer Piping.** This feature allows you to “pipe” an answer previously provided by a respondent into a later question. For example, if you ask survey takers what type of dog breed they own, you might ask them later what factor was important in choosing that specific breed.

Answer: In your system first decide the location where you want to install the spring. Then remove all nearby supports which are not taking load in thermal operating case. Now run the program and the sustained load on that support node is your hot load. The thermal movement in that location is your thermal movement for your spring.

In multi-question surveys, it's sometimes convenient to quote a user's answer to an earlier question. This is called answer piping. You can use this feature by including a word in the format of QX\_ANSWER in the text of a later question. For example, when we display that question to the user, we'll replace Q1\_ANSWER with the full text of that user's ...

6/4/2013 · Piping Stress Interview Questions with Answers  
1) How to make a critical line list or flexibility log? How will you decide the critical line list with help of ASME B31.3? Ans: Basis for deciding Stress critical lines.  
2) How to decide Stress critical systems for analysis using Caesar II?

My first answer to your first question is yes. If you want to place a line stop in a pipe, the pipe must be pressureless; flow should preferably also be avoided. However, there are other ways to make a line stop. Line Stops, sometimes called Stopples start with a hot tap, but are intended to stop the flow in a pipe.

With question code, you need not set piping text for all answer options in Q1. Whatever option you choose, will be displayed in Q2. Uses of piping text. Piping text can be used in the question text, answer option, or logic.  
Question text: Piped text can be used in

**Question And Answer Piping.** This feature allows you to “pipe” an answer previously provided by a respondent into a later question. For example, if you ask survey takers what type of dog breed they own, you might ask them later what factor was important in choosing that specific breed.

Piping is the ability to display answer text within the text of another question. Within the question text or instruction text you can: display an answer to a question in a previous section. display the report text, report text 2 or report text 3 for an answer to a question in a previous section.
