Taylor and Kelly's book "Dermatology for Skin of Color is a masterpiece. I have been teaching dermatology for more than 35 years and it was heretofore very difficult to find a comprehensive resource on skin of color. There has historically been a dearth of information about skin of color in the major dermatologic texts.

Futcher lines, abrupt color demarcations on the flexor surface of the upper arm, are common among adults with skin of color, although rare in infants. In children, hair lines, characterized by an abrupt linear demarcation between the darker, lateral, lanugo hair-containing area of the arm and the medial non-hairy

area, occur in a similar pattern as Futch lines.
