Technology: Sustainable Societies in the 21st Century''. The series will consider four key areas of human activity: technology, economy, society and government. The conferences will explore possible evolutions of key variables and analyse different development paths in order to expose some of the main policy

implications and options.

Technology and human life cannot be separated; society has a cyclical co-dependence on technology. We use technology; depend on technology in our daily life and our needs and demands for technology keep on rising. Humans use technology to travel, to communicate, to learn, to do business and to live in comfort. However, technology has also caused us concerns.
