Four Seasons Make a Year (Anne Rockwell) The Four Seasons (Mary Rius) Four Seasons Series (Nuria Roca) Body. Create a large table with butcher paper. Write the four seasons (summer, autumn, winter, spring) across the top and the following words as rows on the left side of the table: months, weather, holidays, and activities.

We divide up the year into four seasons: spring, summer, autumn, and winter. Each season lasts 3 months with summer being the warmest season, winter being the coldest, and spring and autumn lying in between. The seasons have a lot of impact on what happens on the earth. In the spring, animals are born and plants come back to life.

It's because the spin of the Earth is actually wonky. The axis of the Earth is tilted, which means that in summer we (in the UK) are leaning towards the Sun. As we travel around the Sun, we begin to tilt away and it becomes winter. Have a look at this clip to see how the Earth's tilt changes the seasons.

Alcon Entertainment produces and finances the series. It sold three seasons to Syfy, which canceled the series in May 2018. Amazon Prime Video picked up the series for a fourth season, which was released on December 12, 2019. In July 2019, Amazon renewed The Expanse for a fifth season, which premiered on December 15, 2020.
