In **The Journalist And The Murderer**, Janet Malcolm examines the psychopathology of journalism. She delves into the always uneasy, sometimes tragic relationship that exists between journalist and subject.

The Journalist And The Murderer is a multi-part essay originally written by Janet Malcolm for The New Yorker, published in book form in 1990. Examining the relationship between subject and journalist, Malcolm portrays journalism as an inherently psychopathic profession, arguing that it capitalizes on a distortion of truth under the guise of objectivity.

In **The Journalist And The Murderer** (originally published almost in its entirety in the New Yorker), Malcolm explores the relationship between the journalist and the subject.

The subject was convicted murderer Jeffrey MacDonald. Tells about the lawsuit, which was filed in the summer of 1984. The writer of the piece learned about the trial only after it had ended.

The Journalist And The Murderer examines the concepts of truth and fiction and right and wrong within the framework of Malcolm's investigation into these two people and trials. Malcolm also examines the relationship between the subject and the writer.
