31/3/2017 · ‘ The Rapid Rise of Supermarkets in Developing Countries: Induced Organizational, Institutional and Technological Change in Agri-food Systems ’. In McCullough, Ellen B, Pingali, Prabhu L., Stamoulis, Kostas G. (Eds), *The Transformation of Agri-food Systems: Globalization, Supply Chains and Smallholder Farmers*, 47–66.

The potential of sustaining smallholder farmers (SHFs), for long-term food security remains, within the context of rising modern food value chains, particularly in Africa, a threat. Support for a greener, lower carbon economy that creates jobs and improves human well-being as part of a sustainable and socially inclusive stable economic development should be driven, at least in part, by SHF.

with challenges stemming from the inherent problems of the agriculture sector. The agri-supply chain system of the country is determined by different sartorial issues like dominance of small/marginal farmers, fragmented supply chains, absence of scale economies, low level of processing/value addition, inadequacy of marketing infrastructure etc.

Since 2017, Hinga Weze – a USAID-funded project implemented by Cultivating New Frontiers in Agriculture – has worked in collaboration with agrodealers, farmers, seed multipliers and government stakeholders to improve the scale of HIB production and consumption in Rwanda by building capacity for HIB seed value chain actors, developing a community-based seeds system, and promoting the many ...

The agribusiness sector’s complex value chain spans input companies, farmers, traders, food companies and retailers, all of whom must ultimately satisfy the varying demands of the consumer in a sustainable manner. The sector encompasses huge diversity and variety at each stage, from R&D-based input companies to generic
