3/12/2020 · Flight attendants are humans too, and just like everyone else, they need to sleep on long-haul flights. But where do they do it? Most Boeing 777 and 787 airliners have a secret stairway that leads to a tiny set of windowless bedrooms for the cabin crew — including hidden bedrooms for pilots — that few people know exist.

Night flying restrictions or night-time curfews, including night flight bans, are any regulations or legislation imposed by a governing body to limit the ground-perceived exposure to aircraft noise pollution during the night hours, when the majority of residents are trying to sleep. Such regulations may include restrictions to available flight paths, or prohibitions against takeoffs, or ...

30/1/2015 · Also during the night pilots will be flying IFR, which means the Air traffic control will be keeping planes away from each other. And they hope no birds will be flying in their path. A light on the plane won't be enough to light for obstacle any way and provide a nuisance on the ground for the people trying to sleep.
